

ODP 0-790  
12 June 1980

MEMORANDUM FOR: Deputy Director for Administration  
FROM: Bruce T. Johnson  
Director of Data Processing  
SUBJECT: ODP Report for Week Ending 11 June 1980

Trip to [REDACTED]

The Directors of Data Processing, Communications, Central Reference, and Consolidated SAFE Project Office and several other CIA and DIA personnel visited the [REDACTED] on 5 and 6 June 1980 as the guests of [REDACTED] member of the DCI's Science and Technology Advisory Panel (STAP). Among other subjects, they discussed the ARPA Net Computing environment, managed by [REDACTED] and its relevance to SAFE and other Intelligence Community ADP systems. The visit resulted in two days of productive dialogue between [REDACTED] and IC officers. A highlight of the visit was a demonstration of a prototype display device ("Spacegraph") which uses a vibrating mirror to produce a 3-dimensional image from digital data. [REDACTED]

Major ODP Supported Projects

In April two more ODP supported projects passed the 75% level of the 1980 EXCOM approval. The projects are PERSIGN and ALLSTAR and the user offices, PPPM and IMS, have been requested to provide their requirements for the last five months of the fiscal year. If these requirements will increase the yearly cost by more than 10% of the EXCOM initial approval level, a memorandum of justification and explanation by the user office must be forwarded to the Comptroller requesting an increased approval level.

SAFE

On 4 June the SAFE contractor [REDACTED] submitted a proposal for deletion of the terminal acquisition requirement from the SAFE contract. This proposal was in response to Change Order 10 and the decision to use the Agency standard terminal as the SAFE terminal for both CIA and DIA. Included

in the proposal were revised specifications for: a) TEMPEST requirements for the Bus Interface Unit, b) Personal Identifiers for enabling the terminal at the beginning of each day, and c) Wideband Bus Communications for DIA. [REDACTED]

STATINTL

Support to the Community

4C (Community-wide Computer Assisted Compartmentation Control System). On 5 June the Director of Logistics issued a memorandum which specified several shielded rooms in the [REDACTED] Building for the 4C computer and communications center. While the rooms will not be available until September or October 1981, accommodations might be reached through which earlier work on the communications linkages might be possible, causing minimal impact on the 4C schedule and IOC. [REDACTED]

STATINTL

Support to Office of Finance

New Payroll Study. In conjunction with OF, we have begun a study of the new Payroll system and have started expanding the definitions of 46 Payroll Requirements. This phase of the study will be completed by 27 June. We will then begin to identify items that can be incorporated into the current system, those that will require a new payroll system, and those that should not be automated. [REDACTED]
